Ist dieses System der diakritischen Zeichen überhaupt wohltemperiert? Will heißen: Ist *Dis* identisch mit
Es? Ist [ɛ] identisch mit [ɛ̃]?

i.e. is this rocket science, or not??

1 Goals

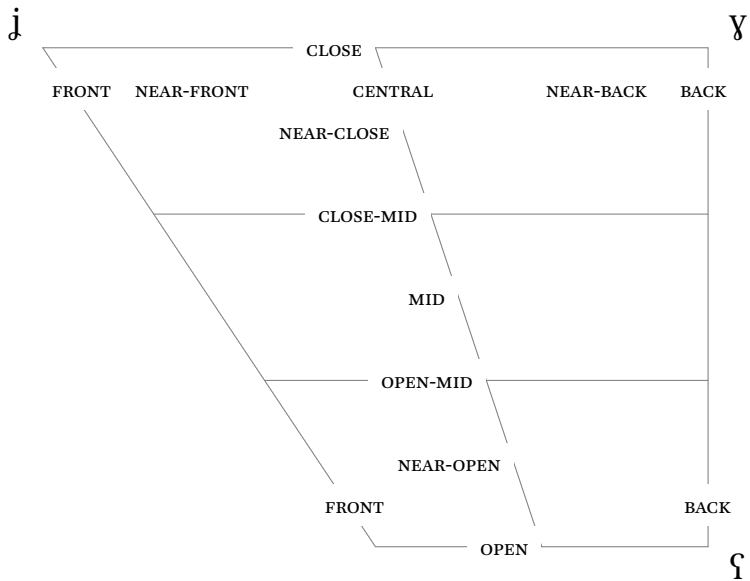

The goals of today's session are:

1. To give an overview of the system of vowel and diphthong phonemes in English
2. To examine the typical phonetic realizations (phones, allophones) of the vowel and diphthong phonemes of English in the Received Pronunciation of British English
3. To begin practising some of the English vowels and diphthongs that can be problematic to speakers of various other languages, especially German

6.3
